

2024 MEDC CDBG PGSI CASPIAN COMMUNITY PARK IMPROVEMENTS

PROJECT

PROJECT DESCRIPTION

WICKWIRE, P.C. provided Professional Engineering Services for the reconstruction of a city park including new concrete tennis, basketball, and pickleball courts, universally accessible playground equipment, a pavilion, site lighting and security, a parking lot, and site furniture in the City of Caspian. We assisted the City with obtaining a grant from the Michigan Economic Development Corporation (MEDC) City Development Block Grant Public Gathering Space Initiative (CDBG PGSI) program in the amount of \$963,000 (90%) for this project. WICKWIRE's services included design plans and specifications, EGLE permitting, environmental assessment, bidding and construction contract award. We were also responsible for construction administration, construction observation, and construction staking. This project will be crucial in refurbishing the main community park in this community. Completion of this project ensures a safe, usable playground for people of all ages and abilities in the City of Caspian. This project is currently in the bidding phase with construction expected to be completed in 2025.
